

CRAFTED WITH PASSION. BUILT TO PERFORM.

Industry Indianapolis – Indianapolis, IN New Construction

1,346 windows and doors

Project Highlights

For the newly constructed luxury mixed-use property Industry Indianapolis, Crystal Window & Door Systems supplied six different products from its high-end aluminum window and glass swing door lines. Nearly 1,350 units were combined to provide expansive floor-to-ceiling views, energy efficiency, effortless operation, and superior comfort. To access apartment balconies, Crystal provided its elegant out-swing terrace doors with ADA compliant low sills.

Crystal's engineering and sales teams worked closely with the architect on the specifications for the complex combined window systems, which were either mulled together or installed in master frames fitted with impost components. To meet delivery schedules, Crystal fabricated products at both its New York and Chicago production facilities.

Atop a 4-story podium for commercial businesses, the 9-story tower offers 232 luxury market rate and workforce rate apartments. The building provides 20,000 sq. ft. of retail and office space on lower levels, an outdoor pool, a fitness center, a parking garage, a courtyard with outdoor kitchen, and co-working spaces. Industry Indianapolis is in the heart of historic Mass Avenue Cultural Arts and Commercial District, one of the most popular places in the city in which to live and work.

CRAFTED WITH PASSION. BUILT TO PERFORM.

Project Partners

Owner/Developer:

Charles Street Investment, Denver, CO

Architect:

CSO Architecture, Indianapolis, IN

General Contractor:

Ruscilli Construction, Dublin, OH

Products and Services

Series 8500 Aluminum High-Performance Windows

- Styles: out-swing casement and fixed
- 3-¼" frame depth
- Narrow sightlines
- 4-bar stainless steel friction hinges (casement)
- 4" opening limit devices (casement)
