Crowne Plaza Mission Valley Hotel

San Diego, CA

Patio Door Replacement

207 Vinyl Sliding Glass Patio Doors

Project Highlights

Crystal Pacific recently supplied 207 state-of-the-art vinyl sliding glass patio doors for the San Diego Crowne Plaza Mission Valley Hotel. The new vinyl and uPVC sliding doors replaced aging aluminum sliding doors and were part of a major renovation completed at the 8-story hotel. An interesting design feature of this hotel is that each guest room has no windows but rather a large 2- or 3-panel sliding patio door for light, ventilation, and access to individual balconies and terraces.

Crystal Pacific sliding patio doors offer great energy efficiency, durability, smooth operation, and sound abatement, perfect for this hotel and its busy location. The MAGNUS commercial uPVC vinyl doors and Buena Vista vinyl doors with superior insulated glass packages control the effects of the Southern California sun and keep guest rooms comfortable year-round. With easy installation frame and accessory options, both products are perfect for renovation and new construction projects at a variety of properties.

The Crowne Plaza Mission Valley Hotel, built in 1959 and renovated several times since then, is located at 2270 Hotel Circle North just off the Mission Valley Freeway. It is adjacent to the Riverwalk Golf Club and convenient to many cultural and recreational sites in San Diego. The hotel has 419 guest rooms, on-site restaurants, conference and meeting rooms, pool and resort amenities, and a beautifully landscaped central courtyard.
