

CRAFTED WITH PASSION. BUILT TO PERFORM.

The Landings at River North – Nashville, TN

New Construction

2,195 Commercial Aluminum Windows

Project Highlights

Crystal partnered with a longtime installation customer to provide a total of 2,195 windows for the two residential buildings at The Landings at River North in Nashville, TN. Some of the most popular models in the entire Crystal lineup, these windows offer many convenient standard and optional features and great energy efficiency. Crystal supplied master frame factory mulling for many large combinations of windows and installations accessories for field mulling other combinations.

The Landings at River North sits on the banks of the Cumberland River on a 12-acre former waterfront warehouse campus. The two residential mixed-use 7-story buildings with ground floor retail are known as The Oxbow and The Wayward, which combined offer 651,387 sq. ft. of residential space, 43,458 sq. ft. of retail and 651 new rental apartments. The overall development also includes retail spaces, office facilities, a hotel, parking garage, and the adaptive reuse of a large historic warehouse. Private streets, decorative paving, lighting, landscaping within the development, and an open-air pedestrian plaza are highlights of the project. Convenient to the I-24 interstate, The Landings at River North is connected to a bicycle path and the existing Cumberland River Greenway.
